RELEVANT PROJECTS

Project Description:

Developed a full-stack web application for user authentication, using React for Frontend pages and Django for backend API development. The application includes a signup and login system, with authentication handled through RestAPI.This project was implemented as both a traditional React app with HTML forms and as an API for client applications.

CAREER OBJECTIVE

Enthusiastic and motivated Full Stack Development Intern with hands-on experience in developing web applications using Python (Django) and React.js. Looking for where I can contribute to both frontend and backend development, while learning from industry professionals to further expand my skills in web development.
